ABOUT ME

A Front-End Developer with one year hands-on industry experience building responsive user interfaces for web applications with Vanilla Javascript and React.js.

I combine my passion for UI design and development to help brands create digital experiences for a long-lasting emotional connection with their audience.

WORK EXPERIENCE

Front-End Developer/Content Strategist, SoEnergy Oy
July, 2020 - Present

- Building a new UI for company website (WordPress CMS + React.js on the front end);
- Improving an inbound marketing strategy and performance for better engagement and brand awareness.

Lead Developer, The Shortcut
Sep, 2019 - Jun, 2020

www.beta.theshortcut.org

- Contributed extensively to the new website development project from the very early stage up until the beta phase through planning and analysing user requirements, creating application architecture and design system, writing software, debugging and deployment;
- Managed cross-functional teams using agile methodology to deliver targets as planned, clearly communicating expectations and deadlines for deliverables;
- Worked closely with designers to develop an interface that answered the company's strategy and business rules, as well as accepted usability principles;
- Reviewed peer code to identify bugs and technical debt, and pushed for better standards offering recommendations for improving their pieces
